

4D Global Infrastructure Fund

Performance report | 31 October 2021

Overview

4D Infrastructure is a boutique asset manager investing in listed infrastructure companies across all four corners of the globe. Our investment objective is to identify quality infrastructure companies, trading at or below fair value with sustainable, growing earnings combined with sustainable, growing dividends. The 4D Global Infrastructure Fund aims to outperform the OECD G7 Inflation Index + 5.5% p.a. over the medium to long term (before fees).

Net client returns (after fees and expenses)

	1 mth	3 mths	6 mths	1 year	2 years p.a.	3 years p.a.	5 years p.a.	Since inception ² p.a.

Iberdrola	5.37
Enel	4.50
Jasa Marga	4.11
Getlink	3.82
Shenzhen International	3.81
Ferrovial	3.54
AENA	3.51
Williams	3.33
Fraport	3.31
Total	40.70

Sector breakdown

Portfolio performance review

The 4D Global Infrastructure Fund was down a net 1.43% (AUD) in October 2021, under-performing the benchmark's return of 0.89% (by 2.32%) and under-performing the FTSE 50/50 Infrastructure Index which was down 0.25% (AUD). Currency detracted 402bps in October with local performance positive.

The strongest performer for October was Spanish integrated utility Iberdrola, up 17.6%. The stock had been over sold and the re-rating came on the back of a strong set of Q3 results as well as the Spanish government relaxing the "clawback" provisions that had resulted in the original sell off.

The weakest performer in October was Chinese gas distributor, China Gas Holdings down 15.4% as fall out from a gas explosion at one of their non-controlled sites continued.

We continue to position for economic recovery, with infrastructure an integral component of that global bounce back. There remains a raft of attractive investment opportunities on offer in the sector.

Month in review

In its October 2021 World Economic Outlook, the IMF forecast the global economy will grow by 5.9% in 2021 and 4.9% in 2022, slightly down on their last 2022 forecasts. This is consistent with 4D's view of ongoing global recovery.

The IMF continues to see Asia as the leading driver of the recovery although headwinds from the resurgent pandemic have dimmed the outlook somewhat. The IMF expects the Asia-Pacific economy to rebound from last year's contraction with 6.5% growth in 2021, led by China and India. Asia's 2022 forecast was raised to 4.9%.

An increasingly resilient recovery is taking hold in Europe, buttressed by gradual increases in vaccination rates and mobility. The IMF's Regional Economic Outlook for Europe now forecasts 5.2% growth for advanced economies and 6% for emerging economies in 2021. Strongly accommodative macroeconomic policies and COVID-19 support schemes have paved the way for the recovery

The IMF is also in the 'transitory' inflation camp (as is 4D) believing recent price pressures for the most part reflect unusual pandemic-related developments and transitory supply-demand mismatches. Inflation is expected to return to its pre-pandemic ranges in most countries in 2022 once these disturbances work their way through prices, though uncertainty remains high.

Speaking of 'transitory issues' and 'supply chain disruptions' in practice, and reflecting that all companies, big and small, can be impacted, Bloomberg report that Apple is likely to slash its projected iPhone 13 production targets for 2021 by as many as 10 million units over prolonged chip shortages. Similarly, due to shortages, the cost of shipping in containers has gotten so expensive that Coca-Cola is switching its cargoes from container ships to vessels normally used for commodities like coal and iron ore to help keep the soda flowing. Should these 'transitory' issues prevail central banks may need to take pre-emptive action.

Italian PM Mario Draghi is trying the near impossible: to reboot Italy's ailing economy after decades of stagnation according to Bloomberg. To do so he'll have to overcome bureaucratic and political hurdles that stymied many of his predecessors. While Mr Draghi has nearly 200 billion euros (US\$232 billion) of EU recovery fund cash to kick start his plans if he really wants to jump start the Italian economy, he has to tackle the country's sluggish south western regions. The government is putting 40% of EU recovery funds into infrastructure, health, education, green and digital projects in the area. At 4D we have consistently been cautious on Italy as an investment destination so these types of reforms would be a very welcome positive.

Geographic Divide

The Northern regions produce a large share of Italy's GDP

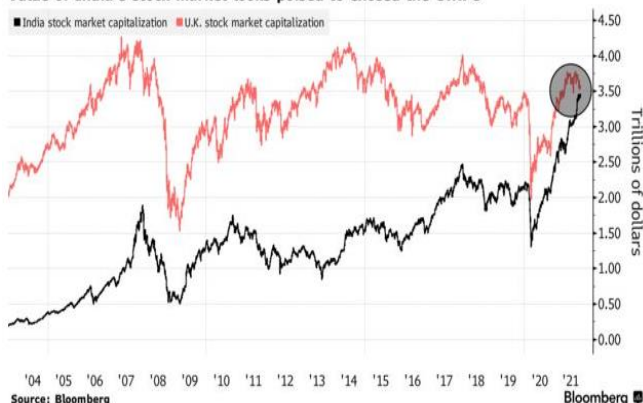

Source: Istat, 2019 data

Going nuclear. China is planning to build at least 150 new nuclear reactors in the next 15 years, more than the rest of the world has built in the past 35 according to Bloomberg. The effort could cost as much as US\$440 billion. As early as 2025 China will surpass the US as the world's largest generator of nuclear power.

Finally, India's equity market is on the cusp of overtaking that of the UK in value to join the world's top-five club. The likely feat comes as record-low interest rates and a retail-investing boom propel stocks to record highs. India's market capitalization has surged 37% this year to US\$3.46 trillion, according to an index compiled by Bloomberg. That's closing in on the UK, which has seen an increase of about 9% to US\$3.59 trillion, though the number is much larger if secondary listings and depository receipts are included. India's share-market capitalization is expected to rise to US\$5 trillion by 2024 according to Goldman Sachs.

Taking Over

Value of India's stock market looks poised to exceed the U.K.'s
