

4D Global Infrastructure Fund (Unhedged)

Performance report | 31 October 2023

Overview

4D Infrastructure is a boutique asset manager investing in listed infrastructure companies across all four corners of the globe. Our investment objective is to identify quality infrastructure companies that are trading below fair value and have sustainable, growing earnings combined with sustainable, growing dividends. The 4D Global Infrastructure Fund (Unhedged) aims to outperform the OECD G7 Inflation Index + 5.5% p.a. over the medium to long term (before fees). It is currency unhedged.

Portfolio performance review

The 4D Global Infrastructure Fund (Unhedged) was down net 1.63% (AUD) in October 2023, under-performing the benchmark's return of 0.64% (by 2.27%) and under-performing the FTSE 50/50 Infrastructure Index which was up 0.17% (AUD). Currency contributed 126bps to performance in October.

The strongest performer for October was UK water operator Severn Trent up 12.3% in the month after a robust Business Plan presentation and associated capital raise which will be used to fund a significant capex pipeline over the next regulatory period. The stock was weak leading into the Plan which we used as an entry point.

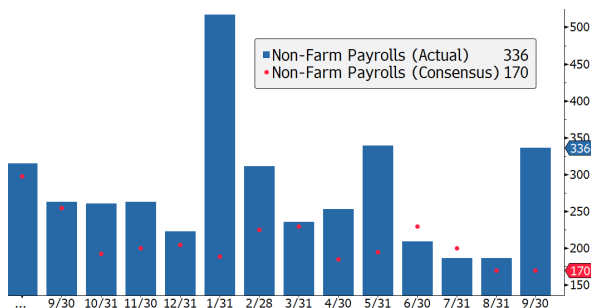

The weakest performers in October were the Mexican Airport operators after proposed unexpected changes to regulation shocked the operators and the market. After 2 weeks of intense negotiations the regulator and airport operators agreed new parameters which while not valuation neutral are marginal, and the stocks look oversold albeit recognising increased concerns on political posturing.

Markets remain volatile on the outlook for inflation, interest rates and economic growth. Most developed market Central Banks are getting close to peak policy rates, with a view to hold rates higher for longer, in an effort to get core inflation back to within target bands over a sustained period. The current share price volatility ignores the fact that listed infrastructure, as an asset class, can fundamentally do well in this environment, with explicit or implicit inflation hedges and long-term predictable earnings profiles underpinned by contract or regulation. Infrastructure is also positioned well should Central Banks overshoot and we face near term recessionary pressure. We believe it is a sensible portfolio allocation at all stages of the economic cycle. We also believe the current pricing is a buying opportunity for the asset class.

Month in review

October continued to be a month where market sentiment once again centred on the "higher for longer" outlook for long-term yields. US ten-year yields rose 35bps in the month to 4.93%, peaking at 5% intramonth (levels not seen since 2007) and taking the 6 month rise to 151bps. MSCI World fell 3.22% (Local), it's third month of declines.

US Non-Farm Payrolls

(Source: Bloomberg)

A driver of the continued march higher in long term yields was strong US data, persistent core inflation (0.3% m/m) and increased planned Treasury bond issuance in 2024.

Overall, activity data surprised to the upside in the US. Third quarter GDP +4.9% annualised, accelerating from 2.1% in 2Q, driven by a resilient US consumer. The labour market remains strong, supporting the consumer, with strong job payrolls (double expectations) amidst softening wage growth. Retail sales were also double expectations at 0.7% MoM in September.

Offsetting these positive US prints was the continued tightening in financial conditions (lowest since November 2022) which is doing part of the Fed's job, as well as 30 year mortgage rates hitting multi decade highs at 8% and consumer credit card balances on the rise with defaults also ticking up. Concerns are also mounting over the heightened budget deficit (~8.5% of GDP from 4% of GDP in mid-2022) which is adding to concerns over Treasury issuance and demand next year, particularly from foreign investors.

In Europe, the European Central Bank (ECB) held rates steady, breaking 10 consecutive rises leading into the meeting. The local growth outlook is weak (GDP contracted 0.1% in Q3) with a lower demand picture and energy prices bringing inflation down to 2.9% in October from 4.3% in September (Eurostat). Forward looking Purchasing Manufacturer Indices (PMI) remained contractionary in October, with private sector output declining at the steepest rate in over a decade (ex-Covid). UK data mostly disappointed, with weak retail sales and consumer sentiment readings while services inflation remains high, with private sector pay 8.1% YoY in September.

Eurozone PMI vs GDP

(Source: S&P Global Market Intelligence, Oct 24 Flash PMI)

In China, activity data reinforced the signs of stabilisation carried over from the prior month. GDP for 3Q surprised to the upside (4.9% YoY) as did retail sales (4 month high of 5.5% YoY in September) and industrial production (4.5% YoY in September), however manufacturing the PMI in October was weaker than expected. There was new fiscal support in China, with the government widening its fiscal deficit ratio from 3% of GDP to 3.8%, releasing RMB 1trn to support infrastructure investment and its 5% 2024 growth target.

October saw the Golden Week holiday in China, with tourist numbers and revenue up on 2019 (+4.1% and 1.5% respectively).

In commodities, so far, the escalation of the Middle East conflict hasn't led to a sustained rise in the oil price, ending the month down 10.7% and taking some strain off the consumer at the bowser). The spillover to other risk assets has so far been limited to the safe haven gold (+7% in October).

Fund details

Feature	Information
APIR code	BFL0019AU
Investment manager	4D Infrastructure
Portfolio manager	Sarah Shaw
Reporting currency	A\$ Unhedged
Recommended investment period	Five years
Cash limit	10%
No. of securities	37
Application/redemption price (AUD) ⁵	1.5289/1.5227
